		Andrew T. Sever	2851			
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)	1) Responsive to communication(s) filed on					
2a)□	This action is <b>FINAL</b> . 2b) This action is non-final.					
3)□	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Dispositi	ion of Claims					
4) ⊠ Claim(s) 1-15 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration.  5) □ Claim(s) is/are allowed.  6) ⊠ Claim(s) 1-15 is/are rejected.  7) □ Claim(s) is/are objected to.  8) □ Claim(s) are subject to restriction and/or election requirement.						
Applicati	on Papers					
9)[	The specification is objected to by the Examine	г.				
10)⊠ The drawing(s) filed on <u>06 February 2004</u> is/are: a) accepted or b)⊠ objected to by the Examiner.						
	Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority u	ınder 35 U.S.C. § 119					
<ul> <li>12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).</li> <li>a) All b) Some * c) None of:</li> <li>1. #### **DETAILED ACTION**

### **Drawings**

The drawings are objected to because part 14 is designated in the drawings as a Signal 1. interlacing device but in the specification as a signal scale down device. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The term used to describe part 14 should be consistent in both the drawings and specification or else a discussion in the specification should define the two terms as synonyms. Appropriate correction is required and no new matter should be entered. A similar error is found in figure 2 with step 4.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen et al. (US

6,367,933.)

Chen teaches in figure 19 a projected image correction method, comprising:

Scaling down image signals that are input (step 1902);

Executing keystone correction for scaled down image signals (step 1904); and

Interpolating corrected image signals (step 1910)

With regards to applicant's claim 2:

See column 2 lines 17-47, which teach that both horizontal and vertical keystone effects are

compensated for when required.

With regards to applicant's claims 3-6:

See figure 3B, which shows the reduction step. Also see column 11 lines 33-57, which teaches

the image is scaled down in both the vertical and horizontal directions based on a predetermined

ratio.

Art Unit: 2851

With regards to applicant's claim 7:

See step 2122 of figure 21.

With regards to applicant's claims 8-15:

See figure 3A, which teaches the actual projector device which executes the methods of claims 1-7.

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US 2004/0156024 to Matsuda et al. teaches in figure 3 a keystone-correcting projector which includes a resizing processor.

US 2003/0142116 to Mochizuki teaches in figure 2 a keystone-correcting projector.

US 2004/0201825 to Kobayshi et al. teaches in figure 4 a keystone-correcting projector and in figure 5A and 5B interpolated image data.

US 2005/0110912 to Song et al. teaches in figure 4 and in the specification a keystone correcting projector and method.
